

AN AMAZING EXPERIENCE

In Only Three & half Hours Without Medicines & without Money The Entire Village was made disease free. Developed Love & affection among themselves. Made water Potable i.e. removal of impurities.

Could you believe even in this modern world the basic things like health & peace is beyond the reach of common man. Medical science has made several new inventions but still 80% of Population is denied access to these facilities. Perhaps same scene was before us ,when we visited Village Gangenkhedha Block Bichia in Uttar Pradesh.

Initial survey reveled the following important facts

- 1. Village comprised of 35 Houses & population of 100 people.**
- 2. More or less everyone was suffering from health problem, among which 5 were Bedridden.**
- 3. They cannot afford to buy Medicine.**
- 4. Lacked basic Facilities.**
- 5. Water was not fit for drinking.**

This survey was conducted on 27th August 2008 at 1130 hrs & around same time Dr Swami Hardas has arrived there. Within 5 to 10 minutes Swamiji has briefed Siddha Volunteers how to identify the problems & other aspects. Then he himself along with trained Volunteers visited every family in the village & tried to access the problems & their causes & after noting down all-important aspects he had conducted training session himself in whom he Guided how total health & peace can be archived even without money. The Problem related with impure water unfit for drinking also can be solved.

Everyone' s heart was filled with Joy as today there prayer were finally heard & Some divine soul has come to take care of them. The Bedridden were also able to move around & started helping others.

Mr. Tiwariji, Who is expert in Water Analysis, Has observed that the Water available From local source was light green in color & High in TDS, Which is was the main cause for their

illness. This kind of impure water found to be in apex 51 other District places also.

Swamiji has invited a couple of local educated residents & trained them in Treatment of Impure water by SWAMI HARDAS LIFE SYSTEM. After adopting this system after 10 minutes, again water was tested .To everyone' s surprise in spite of adverse conditions the purity level has improved considerably.

By now every one was healthy & time has come for Swamiji to leave for another Village, It was an emotional moment, every ones heart was full of joy & gratitude as today they are equipped with Swami Hardas Life System to solve their miseries. Meanwhile Sri Brij Bihari of Village Lakhimpur has reached there who was very sorrowful man as was unable to bear the sufferings of His daughter, Nichala, who was Deaf & Dumb.

Swamiji has called a couple of men & women & explain the problem & process to Solve it. The treatment was undertaken under the guidance of Swamiji & within 10 To 15 minutes The Dumb Girl Nichala was able to utter a few words & also was Hearing some sound. It was most amazingly pleasant moment for one & all there. Every one has vowed to serve the needy on the methods based on Swami Hardas Life System by which it is possible to achieve Health, Peace, and Progress in all aspects of life positively.

TRAINING

The training in various methods i.e. Siddha Marg / Siddha Science / Sish Technology under Swami Hardas Life System is imparted to the interested persons free of cost at following address and also in local areas where the centres are dedicatedly providing the services slflessly for the benefits of all:-

GLORIOUS WORLD ORGANISATION
S. No. 50/7, ' Shaktidata' , (Siddha Nagar),
Siddha Road, Wadgaonsheri, Pune-14 (India)

Interested can enquire for the various training programs either by writing on above address or through telephone mentioned below:-

Phone : 0091-20-27030128, 27031900
Fax : 0091-20-27030314

THE SMALL IS GREATER THAN THE GREATS

Religion or no-Religion has been bone of contention among scholars and common man alike. But in reality neither of the two understood what religion stands for. So the pertinent question is what is the reason behind it. There is no dearth of great Characters in the history of mankind who, by means of their works, presented extraordinary example of service to the humanity and religious tolerance. From incarnation of Gods to prophets and great men like Buddha, Mohammad, Christ, Kabir, Nanak and so many other saints have not only adorned the earth by their gracious presence but also took serious pain to ameliorate the plight of poor and sufferings of the people. They virtually became gods in human form on the earth. They are worshipped even today. At the same time scriptures too impart the lessons of tolerance and service to mankind.

Every religion advocates the oneness of one underlying reality but spares no time or opportunity to refute the doctrines of other religions. The situation has come to such a deplorable low that blood shed of innocent people is considered as the religious and holy act. Human history has witnessed ferocious wars in the name of religion. Does it mean that religion failed utterly. I would say no, religion neither failed nor faltered, only followers could not grasp the real spirit of religion. They worshipped God and Goodman on the earth for getting relief from their sufferings and sorrows. Teachings of scriptures were not put into action. The great lofty ideals of service to mankind remained an ideal or used as means to serve the interest of those people who advocated it in orchestrated manner. Great men came and passed away and along with them vanished their greatness and servitude, leaving behind amazing stories. No doubt they served the humanity but failed to produce a movement of service to the mankind. Religion became dogma stories and rituals only. But what I saw on 24th August 2008 in a small village of Musundi in Unnao district was amazing. The village is inhabited by muslims and backward classes who are neither affluent or educated with few exceptions. The village is proud of having Mazar of great sufi saint Al-Haz-Sufi-Sayad Mohammad-Zakariya-Gulam-Sabir-Hasani. People from all walks of life came there

to pay their respect to great saint. No doubt suffi-saints are revered by every one Hindu or Muslim, Christian or Sikh. Virtually religious barriers are broken every where whether it is Dewa Sharif or Azmer-Shareef so there was nothing amazing and worth mentioning from this point of view. I was there in company of Swami Hardas Ji of Swami Hardas Charitable Trust Pune who was invited as Chief Guest to grace the occasion of annual Urs. Again I would say that this was not peculiar because this has become a fashion now a days to invite people of other faith or political leader in such ceremonies.. But here the selfless warm welcome was quite articulate by its serene presence. Everything was informal but heart-touching Swami Ji inaugurated the centre for service to the ailing people by using Sidha Science method or Hardas life system. I was astonished to know that centre would be run by a person of muslim community Mr. Kalimuddin. I was surprised because Swami Hardas Life System uses many things, such as photograph of Swami Ji, or practice of asking for power from it which are not customary in the community. Contrary to this entire atmosphere was charged with enthusiasm, gratitude and happiness. Kalimuddin told us that when the news of Swami Ji' s programme came to village every person responded quite enthusiastically and warmly. When a hard-core maulana tried to forbid the announcement in the name of Islam Kalimuddin retorted what is wrong in it, when Swami Ji is doing what our great elders Buzurga (a term commonly used for great saints) have preached, why should we oppose it, if you donot like it please go away from here. The use of the term " hard-core" for a maulana by a muslim was making all the difference.

At the gate of Dargah another surprise was waiting for us I saw a banner atop the gate on which Om Namoh Shivaya was written. I could not believe my eyes. The strongest of the strong opposition of recital of Vande Matram flashed immediately into my mind. A small photo of Swami Hardas Ji was on the table in main building of Dargah. In his welcome speech a maulana said " we have realized we are neither Hindu or Musalman we are simply insan i.e. human-beings our sorrows and sufferings are the same, our moments of pleasure are the same. This nation

hope to progress only when every citizen of it would consider himself as a human being only.

At the Mazar Swami Ji was surrounded by Maulanas. He was accorded warm welcome there also. A special islamic cap and sarkari chadar have been presented to him by the priest of Dargah. He has been given the opportunity to offer first chadar to the Sufi Saint. A maulana asked swami ji how are you feeling here among us he replied as ‘ What you feel when you visit your dear brother.’ I came to know that this process of cultural revolution is an outcome of Swami Hardas Life System. A representative of Swami Hardas Charitable Trust Pune Sri Ganesh Kushwaha (he does not like his name to be mentioned) visited for the first time and imparted few fundamentals of Swami Hardas Life System to Munna Bhai, Ramzan, Jamal, Shakeel Mohammad, Harish Chandra and Kamaluddin. This was the initiation of a new era. For poors of the village it was boon came from heaven to save their lives. They were deprived of means and measures so important to the life. Those who were not in a position to purchase even the cheapest tablet this was the mercy of Great Allah-Allah Hoo Akbar. In many cases either present medical system was a failure or beyond their reach. Once the process started patients were relieved of diseases they were suffering from, by men and women having no medical knowledge. For these people Swami Hardas is an angel or something more because angels works alone and relieves men of their sufferings while Swami Ji has made thousands of illiterate people an angel who impart health and peace to the needy. So when the inventor of such miraculus system reached the village there was no religious wall standing between them and Swami Ji or between sufferers and their relievers. The chairperson of Dargah Trust Munna Bhai Sabari told us that he was quite reluctant to accept the claims of the system initially and sent a physician to verify the claim. The Physician himself was the patient of arthritis. But he got relief from pain within few minutes which was the confirmation of the wonderful claims of the system. Mr. Sabir and Kalimuddin along with villagers decided to start a centre of Swami Hardas Life System. They requested Swami Ji to charge the room in such a way that any one who comes here for treatment get relief immediately. I was thinking that Greats were great but the small was greater than greats.

EXPERIENCES

EFFECT OF SWAMI HARDAS JEEVAN PADHATI ON ENVIRONMENT

Nature is the blessing of Almighty to the mankind. It can make or break the Universe. The quality of life depends mostly on the nature. That is the reason we worship the nature in various forms. Most of the people in India depend on the agriculture which is subject to the vagaries of nature. There are plenty of cases of suicide for failure of the crop. Though emphasis has been given on irrigation, the problem could not be avoided.

There are instances when crop has failed for many more reasons. Swami Hardas Life System has helped us to solve many problems in a systematic manner. Few of such instances are presented below:

RAIN HAD TO WAIT FOR CONSTRUCTION OF THE SAKTI STAMBHA

It was a rainy morning on 29.06.2005. I was accompanying P.P.Swami Hardas from Jagatsinghpur to Karanjia. We left early without breakfast so that we can cover some distance early in the morning. While leaving the place we got a call from Karanjia. It was raining heavily. The tent house could not be fixed because of the rain. The organisers found it difficult to reach the place in the rain. They rested the whole night in a nearby school. Their request was to postpone the function till the rain is stopped. They have been doing Kalayan Sadhana prayer with sankalp from early morning. There was hardly any impact. When Swami Hardas was requested to guide, he advised the devotees to pray once more with Sankalp in between to stop the rain. We were astonished to hear over phone that the weather has slowly changed and the rain has stopped. We reached there before noon and started the construction of the Stambha. It was followed by 5 Kundi Mahajagna. Two/Three sight healers were asked to apply Swayasiddha power to divert the rain. Things went on smoothly. After we left the site the rain started. We could realize the blessing of the divine force in our function.

RAIN GOD BLESSED THE MEETING AND BIDHI TO BE HELD AS PER PLAN

Next time after finishing our activity in Bhubaneswar we proceeded to Karanjia in the evening. On the way in the deep forest we were discussing with Swami Hardas the effect of Puja to get the rain. We again wanted to know from him whether Puja can help to stop rain. The deliberation in the night was quite encouraging. In the morning we observed that there was rain in Karanjia. We wanted to experiment the learning immediately. A group of visitors waiting for the Darshan of Swami Hardas were requested to recite Kalyan Sadhana with sankalp to stop the rain and make the function successful. There was cloud in the sky. The local organizer wanted the confirmation for the location of the meeting. The field was ready for the construction of the tent house. Alternatively the high school hall can accommodate about 600/800 persons. Immediately we started the havan. The sankalp was modified to stop the rain and inviting the sun ray for decision on the location. Within half an hour the sun ray was visible. The organisor got the answer and arranged the tent house. The meeting could start at 10.00 AM. When the meeting was in process we received call from Baripada where meeting was scheduled next day to postpone the meeting for the rainy condition there. We assured them not to get panicked. We got confirmation from Balasore and Bhubaneswar that rain was continuing there. The business town of Karanjia in the tribal district of Mayurbhanj in Orissa was privileged to experience the blessing of rain God.

REDUCTION OF ATMOSPHERIC TEMPERATURE THROUGH KALYAN SADHANA

Dr.Swami Hardasji visited different parts of Orissa from 13th April to 24th April 2008. Various types of meetings, workshops, Yoga and Saddhana camps were arranged during his visit. It was summer in Orissa. A meeting was arranged in Chaupada in the district of Cuttack which was about 25 KMs from Bhubaneswar. On 16.04.2008, the weather was extremely adverse in the Summer noon when Swamiji arrived for the meeting. The crowd was sweating in the temperature. The temperature was measured

through a Thermo Meter available in the school. It was 34^o C. The participants were asked to do Kalyan Sadhana with Sankalp for reduction of heat. After 5 minutes when Kalyan Sadhana was over the temperature measured in the Thermo Meter which was 30^o C. There was also cool breeze blowing in the meeting. The change in temperature of 4^o C in 5 minutes was the impact of mass Kalyan Sadhana.

INVITING RAIN THROUGH KALYAN SADHANA AND SAKTIDATA SADHANA

The attendance in Swamiji' s meeting at Duburi in the district of Jajpur on 19.04.2008 was not up to expectation due to the adverse weather condition. The meeting started with Kalyan Sadhana for reduction of Sun-ray and temperature with a request for the appearance of cloud in the sky. In the process of deliberation, Dr. Swami Hardasji advised to perform Saktidata Sadhana for effective result. All the participants were advised to take power from Swamiji three times and apply the same for reduction of temperature and appearance of cloud in the sky. When the meeting was in process thunder sound could be heard. When the meeting ended there was a thin shower of rain. In the evening we got numerous calls from devotees returning back to their villages about good rain fall in their respective villages. Unfortunately there was no instrument available with us to record the change in temperature.

MIRACLES IN THE MEETING OF SWAMI HARDS

DEAF COULD HEAR IN FEW MINUTES

In the evening meeting at Olanda of Balasore district on 23.4.08 a lady seating in front of Swamiji was weeping. When Swamiji enquired about her problem, she showed her son of 6-7 years old having hearing problem. She came with much hope from Cuttack a distance of 200 KMs. Swamiji explained the effect of Matru Sakti and advised her to bless the child in the dias. The mother put both the hands on the head, recited the sankalp three times. She then kept her hands on the ear of the

child, moved in both the direction for 2/3 times and then pressed the hands towards the brain before touching the earth.. When she did it thrice everybody was astonished. The boy could answer the questions raised from the dias enquiring his name, father' s name, education etc.. Tears rolled down again from the eyes of the young mother. It was off course a moment of joy for her. Everybody clapped and enjoyed the incident.

One similar incident happened in a program inside Balasore Jail. Swami Hardas was addressing the inmates of District Jail Balasore on 30th Sept' 2006 All the participants were asked to keep their hands in the disease affected place and recite Kalyan Sadhana as instructed. When they explained their experience it was very interesting to note. One claimed about removal of joint pain, another waist pain, one claimed about removal of head ache, some claimed about feeling better and relieved. One of the participants was unable hear in one ear since last 14 years. After the exercise he claimed being able to hear in the defective ear. The Jailer present there wanted to cross verify. He was asked to close the other ear and respond the query. It was positive atmosphere when all the three questions asked in feeble voice from different directions were replied by him. The meeting got momentum with clapping of the spectators.

DUMB COULD SPEAK IN FEW MINUTES.

Balanga was a small village in Puri district located about 30 KMs from the district Head Quarters. It was the first meeting in that locality. The organisers were spirited. After Swamiji' s deliberations they posed some difficult patients whose progress was slow. One of the patient was a boy of about 14 years who was unable to speak. He has been treated for lat 3 months without remarkable results. The correct process was explained by Swamiji and the healers preferred to apply the same immediately. A group of 5/6 healers put their effort on the spot. It was perhaps destined. The boy started speaking instantly. The speaker was handed to him. He shouted “ Swamiji protect me”. The public present were amazed. People failed to believe that Swamiji is human being. There was clapping and slogans. Everyone present there

bowed their heads. The audience was totally moved. It was a completely different scenario.

EYE SIGHT PROBLEM COULD BE REMOVED

There was a conference on Siddha Science on 29th December' 2007 in Bhubaneswar. The main topic for discussion was the effect of Siddha Sciece on development of the brain of the students. In the meeting there were few students . Some of them were using spec. Swami Hardas invited the mothers of the students using spec to come to the dias. He then taught them how to use matrusakti for removal of the eye defect. One girl student was asked to remove the spec and the the paper. She could not read it. Then her mother was asked to put her hands on the head of the girl and recite the sankalp that my daughter should be able to see. After saying so for three times she was asked to lift the hands and put on the eyes, move it in both direction for $\frac{3}{4}$ times and move slowly pressing towards the brain. She repeated this three times. Then the girl was asked to read the same paper given earlier. She could read it. All the mothers were advised to regularly practice this so that specs can be removed from te kids.

1. Challenge of Impossible Disease for Science

Relief through Siddha Puja, Vadha Hawan of Swami Hardas Jiwan Padhati

Dr.Ghanashyam Sangur of Vidhuna of Kanpur District is an Established Doctor in an Eminent Big Hospital who treats at least 200 patients daily. But, he was too much worried for his daughter Arati who was suffering badly since about seven months. He was personally treating her with utmost care & caution but to no effect. All types of best treatment was provided but that did not show any response and was further deterioration in her health. Faulty treatment and financial problems creped up and barrier stood on the path of the proposed marriage of Arati. Life was, thus miserable for the Doctor named Ghanashyam Sangur.

As per advice of Sri Sabindra Singh of village Gathia, Dist.: Kanpur, Dr Sangur contacted Sri Ganesh Kushwa of Swami Hardas Foundation of Kanpur with some reluctance and apprehension as he had never heard or seen about such treatment being a Doctor. But Sri Ganesh assured over telephone that Arati will certainly be alright with the treatment likely to be applied according to Swami Hardas Jiwan Paddhati. Next day, Sri Ganesh came to the residence of Dr. Sangur and after ascertaining the condition of Arati, he advised to conduct Siddha Puja and Vadha Hawan immediately. Accordingly, the same was conducted. Surprisingly, every body including Dr. Sangur experienced that negativity of the house had disappeared and peace reigned received both within and without. The pain in the stomach and flow of stinking fluid from Lungs of Arati abruptly stopped. She could take fruits and water within 7 (seven) months. Seeing miraculous improvement in the health condition of his daughter Arati, Dr. Sangur was overjoyed and tears appeared in his eyes. Thereafter, Arati slept well. Thus, the worried family got solace as Arati fully recovered from her such ailments and got a rebirth. Being a medical professional merely to convince himself about the actual state of health of the daughter, Dr. Sangur took Arati to LGPGI Lucknow for her detailed medical Investigation where the condition of Arati was confirmed to be normal. Every body rejoiced and experienced happiness which was more than that of the happiness derived at the time of Dewali. This happened only due to grace of Swami Hardasji and his evolved Siddha Puja Vadha Hawan etc. Dr. Sangur expressed that he can now feel emphatically that one can derive relief from any incurable and fatal diseases certainly from the system promulgated by Swami Hardasji.

2. Siddha Puja a religious conglomeration for paving way for Arogya Shanti Vigyan and Viswa Shanti Vigyan

Mr. Kamal Ahmad of Kanpur expresses his gratitude to Swami Hardasji for speedy recovery of his son.

His son Kamran, aged about 15 years was in fact persistently falling ill since his birth. He had suffered from epilepsy with all manifested symptoms. As he dwells in a village, there was no hospital facility nearby. Because of his financial constraints he could not take him to any hospital located in town. He resorted to tantra, mantra for about a decade, which accrued no fruit. Due to grace of God he got relief when he met Sri Ram Prakash Singh of Kanpur who inducted him in Siddha Science by imparting basic training. He started treating his son which slowly worked and his son got relief but was not fully recovered. Then he went to the Siddha Center and met Sri Ganesh who guided him further. Carrying out his instructions and conducting Siddha Puja he treated his son for quite some time and since last 4 months, there is no attack of epilepsy.

Incidentally, Mr Kamal Ahmed fortunately had an occasion to pay his regards to Swamiji who happened to visit Kanpur and expressed before him that he has not seen God but certainly he has seen God in Swamiji.

3. Glorification of Self Less Service

Siddhatha Shakti Prasad of Kanpur had organized one Seva Camp in Dargah-e-Saveri where patients from all over India attended. Some curious people also had opportunity to know about Siddha Science. Patients with complaints of eye trouble, fever pain etc. were treated who recovered from such ailments. Out of the beneficiaries of the said Camp, Sri Kamaluddin and Mr Muna Bhai proposed to invite Swamiji for extending felicitation in the Muslim locality. Although Swamiji was extremely busy, still he was magnanimous and kind to spare some time and attended the function. He was asked as to whether he had any inhibition about castism. Swamiji replied that his motto is selfless service to the bereaved brothers and sisters of the world irrespective of any caste or creed. Such

statement of the Swamiji was largely lauded by the muslim community as it reflected his unfathomable compassion and love for humanity.

4. Visit of Swamiji in Uttar Pradesh

Swamiji had happened to visit the rural areas of various parts of Uttar Pradesh and spent about 3 ½ hrs. with the villagers. He explained about the power of Siddha Science and showed the path for maintaining good health. The Siddha Science developed by Swamiji undoubtedly is an asset for maintaining diseaseless not only development to the field of agriculture and animal kinddom and will pass the way for attaining world peace.

5. Effect of Kalyan Sadhana

Engineer Shrivastav of Allahabad had an unique experience while at his work place. One day, while Mr Shrivastav was in his office, there was strong wind. So, he immediately practiced Kalyan Sadhana and thereby got an inspiration within to instruct his staff to disconnect two feeders. Instantly there he got a telephonic message that a big tree has fallen over the electric supply line. So, he immediately rushed to the machine room to ascertain whether his instructions to disconnect the two feeders were carried out. It was heartening to note that the staff to whom such instruction to disconnect feeders was given had actually done so in time. This saved several lives and also property of the area by obviating a great electrical accident due to inevitable short circuit. It is believed that this happened after Kalyan Sadhan due to grace of Swamiji.

VILLAGE PROGRAMME

One day village programme was arranged on 13.09.08 in the premises of Sibantapur G.P. near Baranga in the district of Cuttack. Sri Gagan Kumar Bastia, local Sarapanch and Sri Dillip Kumar Behera, Sarapanch of Dadhapatna and social workers Sri Santosh Ku. Pani and Niaranjan Sahoo attended the programme. 51 patients got the required training and treated each other. 41 children present there got trained in the field of education.

Sri Badal Maitee aged 30 yeas came to the camp with severe temperature. In the previous day while working in the field with pesticides, he got injury in the lower portion of the feet. He suspected that the blood got poisoned. He developed temperature in the evening. He took chloroquine in the night. The body temperature was around 103 degree. It could be controlled within 10 minutes. Holystick was applied around the wound. He was totally cured while leaving the spot in the afternoon.

Durga Pradhan was having pain through out the body. Balaram Sahoo had problem in his eye. All these patients got 100% result. Patients with joint pain, waist pain, gastric got substantial results. There were two CP patients whom brain exercise and energising was explained.

The tubewell water was tested perch paper. After the power, the difference was shown to the patients. Methods applied in the village: Kalyan Sadhana, Saktidata Sadhana, treating self, acting as doctors wile treating others. Ladies enjoyed the game role of doctor asking the patient about the disease , trating them and then asking about the results. Patients explained their feeling like pain reduction, heat of the power etc. The atmosphere was very positive.

Limitations: Arrival of patients in phases could not allow proper training. Medical test could not be conducted, Patients had no patience to wait and threat for long hours, children with the patients created disturbance.

N.Mohapatra

SIDDHA TECHNOLOGY FOR AGRICULTURE

Soil and water is new lease of life for crops. Existence of crops is totally dependent on the healthiness of soil and water. Agriculture is the main base of life for all living organisms. Everyone's basic need is food. Nutritious food gives health, peace, progress and glorious life, which is possible only when healthy and excellent quality of yield can be produced. Better quality of yield is only possible when both soil and water are healthy. It is observed from last few years that farmers are not taking proper care of soil, which results in the decrease of fertility of soil. Some of the major responsible reasons for the unhealthiness of soil are maximum utilization of soil, improper use of chemicals, fertilizer, water etc. which ultimately affects the cultivation.

Farmers are facing lots of problem day-by-day.

SOIL TESTING BY USING SIDDHA / SISH METHODS:-

Agriculture plays a very vital role in the economic development of any country. To make the soil fertile and productive it is essential to conduct soil and water testing, which provides information about the:-

- i) Quantity of nutrients available in the land.
- ii) Presence of harmful elements in the land.
- iii) Appropriate measures must be taken for maximum cultivation.
- iv) Chemicals and fertilizers required in the scientific method to improve the fertility of soil etc.

PHYSICAL PROPERTIES OF SOIL

- 1) pH of soil and availability of dependent nutrients on it.
- 2) Availability of proper quantity of oxygen in the soil.
- 3) Proper heat or temperature of soil.
- 4) A brittle i.e. light and dry nature of soil.

CHEMICAL PROPERTIES OF SOIL

When we think about soil, it is necessary to consider both physical and chemical properties of soil. Number of chemical properties are dependent on physical properties to test the fertility of a soil separation of Nitrogen, Organic carbon, Phosphorous, Potassium, Calcium Carbonate etc. are essential.

As per specific method following data are the basis of requirement.

- 1) Ph of soil must be between 6.5 to 7.5.
- 2) Nitrogen is the important nutrient of soil.
- 3) Organic carbon is another important nutrient of soil.
- 4) Phosphorous is very much required for the formation of Chlorophyll, fruit or bud formation. Hence, It is necessary to test the availability of phosphorous.
- 5) Potassium is impetus for the formation of digestive juice which is needed for the synthesis of proteins and fats. It is also required for fruit, bud formation.

TABLE - 1
CLASSIFICATION ACCORDING TO DIFFRENT AVAILABLE NUTRIENTS

	NITROGEN (kg/ha)	ORGANIC CARBON %	PHOSPHOROUS (kg/ha)	POTASIMUM (kg/ha)
Very Low	< 140.0	Upto 0.20	< 7	< 100
Low	141.0 -.280.0	0.21-0.40	7-13	101-150
moderate	281.0 to 420.0	0.41 to 0.60	14 to 22	151 to 200
Moderately High	421.0 to 560.0	0.61 to 0.80	23-28	201-250
High	561.0 to 700.0	0.81 to 1.00	29-35	251 to 300
Very High	> 700.0	>1.00	> 35	> 300

SAMPLE OF SOIL FROM SIDDHA MANDIR

A soil sample is collected from five parts of the field from a depth of 24 cm by using pickax (Kudali), trowel (Khurapi), spade (Phawada) a plastic bucket, kept in a cloth bag, the depth of

the pit was measured by the scale. After collection of sample air dry is done, lump is broken by wooden pistle after that powdered sample is collected by using sieve (Chhalani). From this sample we calculated PH, Phosphorus, Potassium, Nitro-

gen and Organic Carbon . For the calculation of above five parameters, we applied 6 methods of Swami Hardas Life System. We calculated all the five parameters giving Sish / Siddha energy, simi-

larly, after giving Siddha / Sish energy, the results obtained were really fantastic and great. Results are shown in tabulated form given below:-

TABLE 2
CALCULATION OF pH

SR.-NO.	METHODS USED	BEFORE SISH ENERGY	AFTER SISH ENERGY	DIFFERENCE	REMARKS
1	Normal (Direct method)	8.5	---	---	Strong alkaline. This soil is saline soil
2	Touch Healing	---	7.5	1.0	Mild Alkaline
3.	Sight Healing	---	8.5	0.5	Moderate Alkaline
4.	Siddha Charger	---	7.5	1.0	Mild Alkaline
5.	Siddha Extractor	---	7.0	1.5	Normal (Neutral)
6.	Siddha Extractor + Touch Healing + Siddha Charger + Sight Healing	---	7.0	1.5	Normal (Neutra)

When the pH of soil was calculated before giving Siddha / Sish energy, it was 8.5, which was strong alkaline in nature and the soil was saline soil. This soil contained enough soluble salt to decrease the productivity of plants but not contained excess of exchangeable Sodium. Such soil is recognised by the presence of white crusts of salt on the surface due to excess of Calcium and Magnesium, Chloride, Sulphate and some times Nitrate. After giving Sidha / Sish energy, remarkable change was obtained in the soil without chemicals.

Various other elements could be checked in the soil. If any farmer goes for the test of soil, he has to give the suggested chemicals and fertilizers for getting good quality crops. It is a very costly affair for farmer, in case he uses it in excess quantity. This will be a side effects and loss of good quality crops. So to avoid such situation, Siddha / Sish method can be applied for agriculture. In this method, we have to take a proper row (Sankalp). The results were astonishing. There was no expenses on fertilizers and chemicals.

TABLE 3
CALCULATION OF PHOSPHOROUS (P) (kg/ha)

SR. NO.	METHODS USED	BEFORE SISH ENERGY	AFTER SISH ENERGY	RESULT	REMARKS
1	Normal (Direct Method)	> 28 & < 35	---	---	High
2	Touch Healing	-----	> 14 & < 21	Change	Moderatel
3	Sight Healing	-----	> 14 & < 21	Change	Moderate
4	Siddha Charger	-----	> 14 & < 21	Change	Moderate
5	Extractor	-----	> 14 & < 21	Change	Moderate
6	Extractor+ Touch Healing+ Sigh t Healing+ Siddha Charger	-----	> 28 & < 35	No Change	High

TABLE 4
CALCULATION OF POTASSIUM (K) (kg/ha)

GERMINATION OF SEEDS BY USING SIDDHA / SISH METHOD

For the germination of seeds, we use 16 methods (one traditional method and 15 methods are of various combinations of Siddha / Sish method). During our experiment, it is found that using Siddha method, the germination rate is much faster than regular method (i.e. traditional method) used by a farmer in the field. The results are tremendous and encouraging. During the process of germination, only Siddha / Sish energy system is used. We never use any chemical or fertilizer for that purpose.

TABLE 7

METHODS	TRADITION- AL (I.E. DIRECT)	TOUCH HEALING	EXTRAC- TOR	TOUCH HEALING + CHARGER	EXTRACTOR + TOUCH HEALING+ SIGHT HEALING + CHARGER
No. of seeds taken	24	20	20	20	20

GERMINATION RESULTS

Phase of germination analysis of seed:-

Crop: Lady finger

Variety: Parbhani Kranti

Certificate germination rate: 70%

Seed sowing is done for following 5 methods :

TABLE 8

NO OF DA- YS	METHODS USED FOR SEED GERMINATION									
	DIRECT		TH		EXTRACTOR		TH + CHARGER		EXT. + TH + SH + CHARGER	
	SEEDS GERMINA- TED	%	SEEDS GERMINA- TED	%	SEEDS GERMINA- TED	%	SEEDS GERMINA- TED	%	SEEDS GERMINAT- ED	%
1	--	--	--	--	--	--	--	--	--	--
2	--	--	--	--	--	--	--	--	2	10
3	--	--	--	--	--	--	--	--	11	55
4	-	--	--	--	--	--	--	--	17	85
5	3	12.50	4	20	2	10	2	10	18	90
6	5	20.83	5	25	5	25	5	25	20	100
7	10	41.67	9	45	7	35	10	50	--	--
8	15	62.50	15	75	10	50	14	70	--	--
9	19	79.17	17	85	12	60	16	80	--	--
10	21	87.50	19	95	13	65	18	90	--	--
11	21	87.50	19	95	18	90	18	90	--	--
12	21	87.50	19	95	18	90	18	90	--	--

From the table 8 above, it is quite clear that not only the germination rate increased with the use of Siddha / Sish method but also seeds were germinated well before. In the similar way, four more phases for the germination were conducted and once again the results were fantastic and unbelievable but it is a fact. With the above results, it is proved that Siddha / Sish method under Swami Hardas life System is one of the best methods available to farmers for getting healthy and good quality crops with full of Life Energy. It is one of the most advantageous methods used.

TABLE 9

S.- N- O.	PARTICULARS	PRESENT METHOD	SIDDHA/SISH METHOD UNDER SWAMI HARDAS LIFE SYSTEM
1.	Germination of Seeds	Slow rate	Faster rate
2.	Fertility of soil	Can be maintained with chemicals and fertilizers	Can be increased without fertilizers and chemicals
3.	Water quality	Can be maintained with some additives	Can be improved without any additives
4.	Plant quality	Normal	Much better
5.	Rate of growth	Normal rate	Faster rate
6.	Product quality	Normal/Good	Good/Excellent
7.	Effect of an adverse condition	Effected	Generally not effected
8.	Disease	May be possible and effected	Very less change
9.	Fertilizers/Chemicals	Required	Not required
10.	Expenses	As per requirement	Very much less than the present method

EXPERIENCES OF SIDDHA METHOD IN AGRICULTURE

- Tomato Cultivation:** By employing Siddha Science method for Tomato crop, the cultivators were able to minimize the wastage of fruits from 20% to 5%. Usually the first yield in each plant will be more and the size of fruits will be big. But in successive yields the size of the fruits become smaller and smaller. But after the Siddha Science method, even in successive yields the size, taste and colours of the fruits were the same till the the last yield of Tomato.
- Rose Flower Cultivation:** It is well known that when the rose flowers were plucked from the plants, the petals would fall within 5 to 6 hours. When these rose plants were treated more in number, bigger in size and with bright colours, besides the withering and falling of rose petals stopped.
- Black grapes cultivation:** Before the Siddha Science method was applied, the yield in plot of 40 cents was about 33 kgs. When the Siddha Science method was applied by Volunteer, the grapes with darker black in colour, the taste of the fruits was much sweeter and the yield was about 1100 kgs per cultivation. The market value of this type of grape fruits fetched more than other fruits. Even Dr Swami Hardas himself tasted them personally when he visited J K Patti.
- Chilly cultivation:** Usually only one full bag of Chilly was the yield per Kujhi. But after the introduction of Siddha Science, the yield shot-up to 10 times. This boost up was due to falling of very few flowers without being fertilized.

Several businessman and vendors approached the J K Patti Siddha Science Service Center for the improvement in their business venture. Volunteers guided these people in Siddha Science Service method. After this business, people reported that there was improvement in their business activities.

DO YOU REALLY WANT - HEALTH, PEACE & PROGRESS AND GLORIOUS LIFE?

The foundation of Siddha work is Siddha energy it works with an aim “Health and Peace to All, progress of All” the basic requirement of individual’s life is good health after that door is open for peace, progress and glorious life. Through scientific development and medical science touches the sky which is a good sign but parallelly problems and sufferings also increases. Now question arises – “Why It Is So?” it means something is wrong some where. For that W.H.O. had planned “Health to All” by 2000.

It is better to build your own power within yourself for achieving healthy, peaceful and progressive environment for making life glorious. For that it is necessary to learn a good technology which not only maintains the health but also gives peace and progress. Swami Hardas Life System is the system which has that type of capabilities. It is very simple system. Anyone can learn it, daily few minutes practice of it can made life glorious.

Steps involved

1. Complete the basic training
2. Practice the methods taught in the training.
3. Mention your problem.
4. There is a solution for each problem, inquire about it in the organization and do as per the instruction.
5. For fulfilling your wishes do as per the instructions.
6. Make your family healthy, peaceful and cooperative.
7. Your concerning matters should be positive.
8. Do Glorious Life Exercise to achieve glory in actual life.

All the above mentioned steps will not take much time during practice.

With little adjustment you can perform the activities within a busy schedule. This keeps person healthy, peaceful and progressive.

For this contact

Health & Peace Foundation
Shaktidata, Siddha Nagar, S.No.50/7,
Old Mundhawa Road, Wadgaonsheri,
Pune-14

Please send D.D, of Rs.101/- in favour of Health & Peace Foundation as consultancy charges

In case of emergency, accident, operation or for other various problems.

Distance healing/divine process will be done free of cost.

Interested person can send donation in turn of Cash or D/D in favour of swami Hardas Charitable Trust, Pune.

Solution for your major problems

There are different types of problems some of them are minor while some are major. We try to help you in solving your problems by –

1. SIDDHA (Siddha Marg)

Those who have strong faith in Indian mythology and are ready to do as per guidance can try to get the solution from the method. In Siddha marg mantras, home, hawan, rituals etc. are included. For more information read “Swayam Siddha Upay Yojana” book.

2. SISH (International method)

SISH Stands for Special Induction System for Health. Person of any religion can try to solve his problem through this method. For

more detail informations read books Swamj Hardas Life system and basic sish Technology. You are free to select any one method.

Fulfilling wishes

Both the above mentioned method is helpful for fulfilling the individual wish if it is good or satwik. Hence it is necessary that we have to think about good wishes. These methods are not support you for bad wishes or anything which is harmful to someone.

Family

There are few members in a family all of them having different nature, views, behaviour, requirements and problems. In this situation it is really a typical task to maintain health, peace and cooperation in the family. In some family situation is very horrible due to this their progressive activities stops. In that case it is necessary to remove negativity and problems from that family so that family members become healthy, peaceful and progressive. For solving this problem we can guide and provide health through Siddha, sish and glorious life exercise methods.

Concerning matters

In most of the cases people are struggling in concerning matter life business, service etc. This problem arises due to lack of healthy, peaceful and co-operative environment some times we will put all our efforts for work but still we will not get proper results up to our expectations. For solving this problem we can guide and provide health to individual one through Siddha, sish and glorious life exercise methods.

SW AM IHARDAS CHAR ITABLE TRUST IS REGISTERED UNDER SECTION 80 G OF TAX EXEMPTION ACT. UNDER THIS SECTION DONORS WILL HAVE SPECIAL PROVISION OF EXEMPTION FROM CERTAIN TAXES.

SIDDHA ENERGY

Siddha is the name of divine power and Siddha energy is the divine power' s graceful energy. Base of Siddha Science / Sish Technology is "Energy" and "Energy Field" Siddha energy is the base of Siddha Work. Siddha Energy is based on the law of conservation of energy. The aim of Siddha Work is to provide "Healthy life status , Peace, Progress, Glorious Life and Divine Peace to All." which are the basic needs of actual life? Siddha energy works for the correction of energy field. If the energy field is disturbed it means there is negative form of energy is in action, which results in the loss of healthy life status , peace and progress in life. In such situation Siddha energy plays a vital role and corrects the energy field without medicine and money, which provides healthy life status , peace, progress and glorious life and this is known as positive energy field.

Siddha energy is auto balanced because it acquires the correct and required percentage of energy. During this process it removes the extra energy. Siddha energy is awakened by Siddharth (the one who completed basic training of Siddha Science) only. ' Volunteer' acts as a convertor because, as per the law of conservation of energy, the energy can be converted from one form to another with the help of convertor. Any person can be made convertor by Siddha Process. This Siddha process is invented by his holiness Dr. Swami Hardas with the blessings and guidance of Lord Siddha Gorakshanath for the betterment of society.

LAW OF CONSERVATION OF ENERGY : IT STATES THAT

" Energy can neither be created nor destroyed. It can be changed from one form of energy to another form of energy" . Universe and each thing in the universe is a combination and co-ordination of many forms of energies.

MAJOR FAILURES ALMA ATA

1. REVIEW OF ALMA ATA

The international conference on Primary Health Care was held in Alma-Ata, USSR between the 6-12 September, 1978.

Declaration

“The conference strongly reaffirm that health which is a state of complete physical, mental and social well being, and not merely the absence of disease of infirmity, is a fundamental human right and that the attainment of the highest possible level of health is a most important world wide social goal whose realization requires the action of many other social and economic sector in addition to the health sector”

Failure

- i. Fails to provide better quality of life to the people.
- ii. Not able to provide peace to world.
- iii. Not able to provide good economically and socially productive life to all people in the world till date.
- iv. Primary health care is the key to attain the socially and economically productive life is not materialize properly and things become more critical.

2. PREDICTIONS OF 1998

HEALTH REPORT

Health report 1998 predicted that by 2015 –

- i. Over all risk of cancer will continue
- ii. Cases of death from lung cancer will increase

iii. Hepatitis B vaccination is required to decrease possibility of lever cancer.

iv. Diabetes cases will be more than double globally.

Which is an alarming call for all of us. Sadly, even after 29 years of Alma-Ata International Conference it is not materialized properly and the concepts “Health to All” was not only misunderstood but also misinterpreted. The pledge taken to implement “Health to All” is still continues to be a big question for countries.

3. LEADING KILLERS

Some of the chronic disease which are considered as killer till date there is no solution for them some of them are –

- a. Diabetes
- b. Cardio Vascular Disease (CVD)
- c. HIV/AIDS
- d. Blood Pressure
- e. Tobacco epidemic
- f. T.B.
- g. Overweight-obesity
- h. Cancer etc.

Many countries in the world which are fighting for their survival due to chronic diseases. In such countries 45% population is suffering from disease like AIDS alone and many others are having diseases like diabetes etc.

4. INDIA' S STATUS

India' s health sector is crying out for intensive care and need medical

emergency as published in Sunday Times, The Times of India, Pune dated July 9, 2006. India accounts for 16.5% of global population, it contributes to a large number of the world's diseases.

India contributes

- a. 33% of the world's diarrhoeal diseases.
- b. 25% of the world's maternal deaths.
- c. 20% of nutritional deficiencies.
- d. 19% of the world's diabetic population.
- e. 20% of female cervical cancer cases.
- f. 70% of the world's leprosy patients.
- g. Second largest number of HIV/AIDS cases in the world.
- h. Second largest pool of Hepatitis B carriers in the world.
- i. India loses about Rs.13,500/- crores per year due to T.B.
- j. Polio is making a strong comeback.

A disease never waits. It just becomes more chronic, more resistant and more lethal. While old hazards continue to cripple and kill, new diseases have started to rear their head.

India has the dubious distinction of being the diabetic capital of the world and around 4 crores diabetics which is the 19% of the world's diabetic population. Nearly 12.5% of India's urban population is diabetic. By the year 2030 it must be more than 8 crores which is an alarming call for all of us. Among its more chronic complications, diabetic foot is the most devastating result. Over 50,000 leg amputations take place every year due to diabetes in India.

In the year 2005 nearly 3.8 crores cases were detected in Cardio Vascular Diseases (CVD) and which will rise up to 6.4 crores by 2015. Health Ministry is planning to introduce a national programme on diabetes and CVD (Cardio Vascular Disease) is yet to take off.

Tuberculosis has become the largest killer among adults. According to T.B. Research Centre, nearly 76 lakh people are suffering from T.B. in India and annually 4 lakh people are dying due to tuberculosis.

Polio which has been largely eliminated in most of the world still exists in Nigeria, India, Pakistan and Afghanistan. Till June 29, 2006 nearly 60 cases have already been detected in India as against the total number of 66 cases detected in the whole of 2005. According to officials of India's Polio Eradication Programme, India was worst affected by Polio and accounted for 83% of the world's new cases in 2002 when 1,600 cases were detected, 1,242 in U.P. alone India has consistently missed deadlines to achieve zero polio levels.

Cancer accounts for nearly 3.3% of the disease burden and about 9% of all death. In the year 2004 there are about 8 lakh cases detected as cancer and by 2015 the expected figure will be raised to nearly 10 lakhs. Nearly 6.70 lakh are expected to die due to cancer. According to the Indian Cancer Society, every fifth woman with cervical cancer in the world is an Indian woman.

On December 31, 2005 there were 1,06,666 leprosy patients under treatment in India. Though India has managed to largely eliminate leprosy, it is one of only eight countries in the world to still have it. India also has the second largest pool of hepatitis B carriers, of which 10% are highly infectious. Ministry records say one in every 20 people in India is a carrier of this deadly virus, which is the cause of 80% of all liver cancer and about 1% of all adult deaths.

In India about 52 lakh people are infected with HIV/AIDS, A recent UNAIDS survey has however pegged the number at 57 lakh and the antiretroviral drug has been administered only to 35,000/- patients. India's plan to give it one lakh people by early next year is being looked at by experts as unrealistic.

The Times of India, Pune dated August 29, 2006 published an information **“Railways receives the HIV/AIDS Shock”**. According to it 4% of field staff can't do strenuous work in the near future. 1,717 employees of Mumbai division have tested HIV/AIDS positive as per the July 2006 railway medical records. There are nearly 40,000 employees are working in both Western & Central Railways Mumbai division. The data collected by the Central and Western railways, also reveal that 254 full blown AIDS victims are currently taking Anti Retroviral Treatment (ART) at different railway hospital across Mumbai and Kalyan divisions respectively.

The statistical information related to this deadly virus is shown below -

DEADLY VIRUS SETBACK

	Central Railway	Western Railway
HIV employees	746	976
Taking ART treatment	191	63
Succumbed to HIV	352	148

(Source : Railway Medical Records)

Hence, the above mentioned facts and experience itself proving that present system is not having a proper solution and not able to fulfill the dream “Health to All”. It is looking very difficult to make world glorious with the present system.

“IT IS POSSIBLE ONLY BY SWAMI HARDAS LIFE SYSTEM”

Reasons of not getting Health & Peace because it is the basic need of life. Why every-body is not getting Health & Peace? The main reasons are :-

1. **Facilities :-** It is not possible to provide facilities at every place & in every village.
2. **Specialist & Trained Staff :-** It is not possible to provide specialists and trained staff at every place.
3. **Cost :-** Medicines, Infrastructure and machinery are very costly. Hence over all cost is too high which is beyond the scope of poor and middle class persons.
4. **Arrangement like Hospitals, Infrastructure and other requirements can not be made at every place.**
5. **Materials Medicines and Medical facilities are not available at every place temp for flung averb.**
6. **Side effects, wrong diagnosis / treatment / operations etc. And many more reasons.**

CORDIAL INVITATION

On the Occasion of -

**"WORLD SCIENCE DAY
FOR PEACE AND DEVELOPMENT"**

Exhibition-cum-Practical Demonstration.

**We humbly request your presence on a very
Special Exhibition and demonstration
on the Practical solutions of
today's Major problems.**

- Like -**
- 1) **Nearly 80% people of the world can not get the benefit of today's Science and present Methods.**
 - 2) **Shortage of Health & other Specialists and others workers.**
 - 3) **Problems in Africa and other poor countries and many more.**

Venue - *Shaktidata, Siddha- Nagar, Siddha Road,
(Old Mundhawa Road)
Wadgaon Sheri, Pune – 411014 (India).*

Days - *1st to 10th November 2008.*

Timing - *10 am to 7 pm Daily.*

ORGANISERS-

Swami Hardas Global Volunteers Organizations And
Swami Hardas Foundation, With the help of other Siddha Organizations.

Note : Registration in advance will help us in giving you better services, We are at your service.

SWAMI HARDAS LIFE SYSTEM (Siddha Science)

“ World Science of Peace & Development”

- ? Aim -**
1. *To make every-one capable of solving Self and Others problems and to make Life Glorious Without Money and Medicines.*
 2. *To establish Health, Peace, to achieve Development and Glory.
Particularly Poor, Troubled in rural areas and those who cannot get the benefits of present costly technology.*

- ? Base -**
- 1) *Selfless Service* 2) *Good-deed* 3) *Humanity* 4) *Research and Development.*
 - **Hence Training and Guidance is - Free.**
 - **Services as much Possible - Free.**

? Work - This is purely non-commercial, non- political and non-religious service to the mankind.

? Special Features -

Astonishing and unbelievable – results are achieved by Swami Hardas Life System.

This Exhibition and Live Demonstrations would give you an occasion to get acquainted with Swami Hardas Life System.

Note – Persons from International Organizations, Governments and other Organizations can reach by world Science day function to be held on 10th November. Come, see, have realisation – go back and give a messages of the function "world Science day" for Peace and Development On 10th November 2008.

**A FEW ASTONISHING AND UNBELIEVABLE FACTS AND PRACTICAL
ACHIVEMENTS OF SWAMI HARDAS LIFE SYSTEM.**

1. One village can be made Healthy, Peaceful, Co Operative and Progressive –
 - Time Required – One Day.
 - Expenses – Nil – No medicine and No money.
 - By Whom – Local Residents.

It also Covers – Agriculture, Animals, Production and all subjects of Life

2. Body can be brought to Ideal, Natural, Positive state without Medicine & Money –
 - And can be maintained in the same state, for the whole Life
 - There by solving all the problems of Health – Like Blood-Pressure, Diabetes, etc,
3. Chemistry of items – i.e. water, Soil, etc. can be changed to Ideal positive state. Germination of seed can be increased.
4. This is totally independent – Nothing is required, Hence it can be used anywhere and at time by the trained persons.
5. Totally Harmless – No side effects, cannot be misused, totally safe.
6. This is the simplest way.

Hence – This is being used throughout the world. This is the best system for the poor, very poor & for those who cannot afford costly medicines and technology.

Note - All rights of this Exhibition are reserved with, Swami Hardas Global Volunteer Organization and subject to Pune' s jurisdiction.

VENUE LOCATION PLAN

- Web - www.scienceandbeyond.org
- How To Reach - Pune is educational and cultural capital of Maharashtra, with temperature ranges from 20 to 30 degrees through out the year. It is just 3 hours journey from International airport by trains, buses from Mumbai (Bombay). Our establishment is within the city, 6 kms from airport and 9 Kms from Railway station. There are direct flights from Mumbai and Delhi to Pune and a very good connectivity of Railways, Buses and Taxies service. After Reaching Pune Please contact us.

SWAMI HARDAS LIFE SYSTEM

After looking seriously towards the available statistics of health problems definitely there will be a search required for solution and every one's finger points towards Swami Hardas Life System. This is the only system which is the perfect answer for all the problems related to physical, mental and intellectual.

Swami Hardas Life System proves his ability on number of occasions. The major aim of the system is to work for the humanity and to fulfill the dream "Health to All". In today's commercial world every thing is taken in a professional way, Swami Hardas Life System is standing with self reliance and dignity for the humanity.

Dream of **Health to All** can be achieved easily when Swami Hardas Life System is used with present system.

Swami Hardas Life System overcomes all the limitations of present system and provides a solution for "Health to All".

Swami Hardas Life System is a system which is the need of hours. It is a result oriented system which has a capability to provide complete health, peace, progress, glorious life and divine peace to all. This system also provide solution to all concerning matters related to actual life such as Agriculture, Education, De-addiction, Business etc.

Swami Hardas Life System is a fine combination of science, humanity and spirituality. It is well known to us that science is misused and there is a possibility of side effects. While Swami Hardas Life System is totally harmless and never be misused.

Swami Hardas Life System makes individual life, family, society, country and the whole world glorious without harming any one.

OBJECTIVES OF SWAMI HARDAS LIFE SYSTEM

The main objective of Swami Hardas Life System is to bring health, peace, progress and divine peace to all. With the help of this system every one is able to solve their own problems and can also able to solve other's problem too without medicine and money. When Swami Hardas Life System is used with present system, a dream of "Health to All" can be achieved very easily in a short span of time without harming any one.

Now-a-days health is Industry and is a complete business due to which there is a very little scope for humanity. Those who are interested to serve for the humanity and health, peace to all are welcomed and cordially invited.

FEATURES OF SWAMI HARDAS LIFE SYSTEM

1. It covers whole range of health and other problems in actual life

- a. Physical, mental, social and intellectual problems.
- b. Problems related to peace, agriculture, education, business etc.
- c. Provide permanent relief.
- d. Try to cure normal, complicated & incurable diseases.

2. Cheapest in the world

- a. Solve health problems – physical, mental, intellectual etc. of individual and family members.
- b. Solving problems related to peace and progress with negligible expenses.
- c. Any type of infrastructure, material, machines, medicines etc. are not required.

3. Simplest in the world

Any person with normal understanding and ability to do as per instruction given during teaching can learn it in a very short span of time.

4. Total harmless

- a. No side effects.
- b. No medicines is required/given.
- c. Cannot be misused.
- d. Diagnosis of the disease not required hence time is saved.

5. Cover whole range of humanity and life

- a. Person of any religion can do it.
- b. It is available for whole community whether they are poor, rich, literate or illiterate.

6. Most efficient and result oriented

- a. Solve the problems in a short span of time.
- b. It is very effective and efficient.
- c. It is result oriented.

In Today' s Commercial Era

Each individual is able to take care of his own welfare as well as that of others.

- 1. Siddha Karya founded on selfless service good deeds, humanity, values with sensitivity.
- 2. Explanation of how every body could be healthy, attain peace, make progress and have a glorious life without money and medicine.
- 3. Each individual is able to take care of his own welfare as well as that of others. Such Siddha Karya is being carried out all over the world.
- 4. Any individual can experience health, peace, attain progress, farming, education or any other work in his/her life after just a few hours training which is why Siddha Karya is prolifited.
- 5. A common family man becomes capable enough to benifit himself after under going the Siddha process and can contribute in Community welfare. Some Sadhakas are imparted the powers of Shaktipat i.e. to incapacitate somebody or make him feeble after they complete some energy transfer protocal. As this is very simple

Siddha Karya has proliterated all over world.

- 6. Some things can be turned into Siddha (having some unique powers or properties) Today many things are available in Siddha Mandir.
- 7. I have proven on the world platform that relief can be experienced from any ailments within just 4 minutes creating history at world level. This was the first time that several such things happened all over the world and have since been happening. Besides the above I did several other important things which include almost everything in life.

- Dr. Swami Hardas
